WELCOME

The ERA-NET PathoGenoMics has implemented three multinational calls. A joint status seminar will be organized on the ongoing projects funded under its 2nd and 3rd joint calls in order to get an overview of the research undertaken and the results obtained in the ERA-NET.

The funding period for the 2nd call's projects is Mar. 2009–Feb. 2012, and for the 3rd call's projects it is Mar. 2011–Feb. 2014. Thus, this will be the last seminar for the 2nd call's projects and it will be a part of their final evaluation.

We invite all project coordinators and all project partners of the research projects funded by these two calls. Furthermore, we invite one junior researcher per partner from each 2nd call project to present his/her findings as a poster.

The programme consists of presentations of the two calls' research projects. The seminar offers researchers a forum to meet, to present their findings, to exchange research ideas and to make further contacts.

The weather on the southern coast of Tenerife in January is typically sunny and fairly pleasant. The temperature is about +20 °C during the days and +15 °C in the evenings.

HOW TO REACH THE VENUE

Tenerife is one of Spain's Canary Islands. The Tenerife Sur (*south*) airport is 27 km from the hotel and the Tenerife Norte (*north*) airport 85 km from the hotel.
